

Fintech — Real-time Fraud Scoring

Client: APAC Digital Bank · **Region:** SEA

Workload

Ensemble scoring, 380k TPS sustained

Deployment topology

Sovereign Edge (SG, ID, PH) · dual-active

Measured results

Metric	Value	Note
Scoring latency	6 ms	p99
False positives	-31%	vs prior stack
Uptime	99.995%	12-month

Methodology

Figures anonymised at customer request. Latencies measured at the client SDK boundary over rolling 14-day windows. Cost deltas reference the customer's prior production stack, normalised per token-equivalent.
